

## Mouse IgG2b control FITC-conjugated

FITC-conjugated monoclonal antibody

Cat-No: **21335033**

500 µl

**Clone:** GC198

**Specificity:**

This clone has been derived from ascites fluid of tumour bearing mice. This monoclonal antibody reacts with the outer membrane protein of some strains of *Neisseria gonorrhoea*. No reaction with human cell surface or plasma components has been observed. However, some binding to Fc receptors may occur.

**Isotype subclass:** Mouse IgG2b

**Form:** The antibody was purified using column chromatography (ion exchange and/or affinity chromatography). Conjugated with fluorescein iso thiocyanate isomer 1 (FITC). Molecular F/P ratio is between 5.0 - 10.0.

**Physical state:** Liquid

**Buffer/Additives/Preservative:** PBS containing 1 % BSA and 0.09 % sodium azide (pH 7.2)

**Expiration date:** The reagent is stable until the expiry date stated on the vial label.

**Storage conditions:** Store at 4 °C. Avoid prolonged exposure to light.

**Application:** Flow Cytometry

**Warning:** Sodium azide is harmful if swallowed (R22). Keep out of reach of children (S2). Keep away from food, drink and animal feeding stuff (S13). Wear suitable protective clothing (S36). If swallowed, seek medical advice immediately and show this container or label (S46). Contact with acids liberates very toxic gas (R32). Azide compounds should be flushed with large volumes of water during disposal to avoid deposits in lead or copper plumbing where explosive conditions can develop.

This material is offered for research only. Not for use in human. For in vitro use only. ImmunoTools will not be held responsible for patent infringement or other violations that may occur with the use of our products.
