

## anti-human CD62E no azide

### Monoclonal Antibody hCD62E to CD62E (Human)

Cat-No: **21348620**

100 µg in 100 µl

**Clone:** hCD62E

**Specificity:** CD62E (also known as E-selectin, ELAM-1, and LECAM-1) is a 115 kD type I membrane protein and a member of the selectin family. CD62E is highly expressed on activated endothelial cells and can also be expressed on endothelial cells in the skin, bone marrow and placenta. CD62E is involved in tethering and leucocyte rolling on activated endothelium at inflammatory sites and may also play a role in tumor metastasis and angiogenesis. CD62E binds to both CD15s and CD162.

**Isotype subclass:** Mouse IgG2a,k

**Form:** The antibody was purified by affinity chromatography.

**Purity:** > 95% (by SDS-PAGE)

**Physical state:** Liquid

**Buffer/Additives/Preservative:** sterile PBS, pH 7.2

**Expiration date:** The reagent is stable until the expiry date stated on the vial label.

**Storage conditions:** Aliquot and store at -20°C. Avoid freeze/thaw cycles. Should be handled under aseptic conditions.

**Application:** Functional application

**Background:** The Selectin family is comprised of three members, E-Selectin, L-Selectin, and P-Selectin. E-Selectin (CD62E) is transiently expressed on vascular endothelial cells in response to IL-1 beta and TNF-alpha. L-Selectin (CD62L) is expressed constitutively on a wide variety of leukocytes. Two forms of L-Selectin have been reported, apparently arising as a result of post-translational modifications. Human P-Selectin (CD62P) is expressed by activated platelets and endothelial cells.

This material is offered for **research use only**. Not for use in human. For in vitro use only. ImmunoTools will not be held responsible for patent infringement or other violations that may occur with the use of our products.
