anti-mouse CD55 PE-conjugated

PE- conjugated monoclonal antibody RIKO-3 to mouse CD55

Cat-No: 22150554  500 µl

Clone: RIKO-3

Specificity: The anti-Mouse DAF monoclonal antibody (Clone: RIKO-3) detects DAF; one of several membrane proteins that prevent host cells from homologous complement attack. The two mouse DAF isoforms are effective against rat complement, but not against human and guinea pig complement. GPI-DAF is expressed only in testis. Both types of DAF transfectants avoided C3 deposition more successfully than non-transfectant cells.

Isotype subclass: Armenian Hamster IgG

Form: The purified antibody is conjugated with R-Phycocerythrin (R-PE) under optimum conditions. The reagent is adjusted for direct use. No reconstitution is necessary.

Physical state: Liquid

Buffer/Additives/Preservative: PBS containing 1 % BSA and 0.09 % sodium azide (pH 7.2).

Expiration date: The reagent is stable until the expiry date stated on the vial label.

Storage conditions: Store at 4 °C. Avoid prolonged exposure to light.

Application: Flow Cytometry

References:

Warning: Sodium azide is harmful if swallowed (R22). Keep out of reach of children (S2). Keep away from food, drink and animal feeding stuff (S13). Wear suitable protective clothing (S36). If swallowed, seek medical advice immediately and show this container or label (S46). Contact with acids liberates very toxic gas (R32). Azide compounds should be flushed with large volumes of water during disposal to avoid deposits in lead or copper plumbing where explosive conditions can develop.
