

## anti-rat CD48

### Monoclonal Antibody MRC OX- 45 to CD48 (Rat)

Cat-No: **23150481**

100 µg in 100 µl

**Clone:** MRC OX-45

**Specificity:** This anti-rat CD48 (Blast-1) monoclonal antibody recognizes a rat cell surface glycoprotein of 45 kDa that is present on a wide variety of hematopoietic cells and endothelial cells. The antigen is identical to the mouse BCM1 antigen. This antibody inhibits allogenic mixed lymphocyte reactions using lymph node cells as responders and spleen cells as stimulators. CD48 has recently been identified as a ligand of the NK cell inhibitory receptor CD244.

**Isotype subclass:** Mouse IgG1

**Form:** purified

**Physical state:** Liquid

**Buffer/Additives/Preservative:** PBS containing 0.09 % sodium azide (pH 7.2).

**Expiration date:** The reagent is stable until the expiry date stated on the vial label.

**Storage conditions:** For long term storage, aliquot and freeze unused portion at  $-20^{\circ}\text{C}$  in volumes appropriate for single usage. Avoid freeze/thaw cycles.

**Application:** Flow Cytometry

**Warning:** Sodium azide is harmful if swallowed (R22). Keep out of reach of children (S2). Keep away from food, drink, and animal feedingstuff (S13). Wear suitable protective clothing (S36). If swallowed, seek medical advice immediately and show this container or label (S46). Contact with acids liberates very toxic gas (R32). Azide compounds should be flushed with large volumes of water during disposal to avoid deposits in lead or copper plumbing where explosive conditions can develop.
