

IT-Box-Systems for Flow-Cytometry

ImmunoTools special IT-Box-Systems give you the best price/quality ratio.

The IT-Box-Systems designed for flow cytometry contain vials with each 100 µl of fluorescence conjugated antibodies against human antigens.

anti-human

[human IT-Box 138](#): 100 fluorescence conjugated antibodies (FITC, PE, PE/Dy647, APC)

anti-mouse

[mouse IT-Box m270](#): 70 fluorescence conjugated antibodies (FITC, PE, APC)

please note: The amount of antibodies you need for your assay is USER-dependent (dependent from cell amount, receptor density, incubation volume, incubation time, temperature, quality of the antibodies, quality of the laser and detectors). You can do between 10 to 250 experiments with each antibody. If you use the antibodies at the first time, please do some dilutions to find out the best concentration for your individual requirements.
