## anti-human IT-Box-140

designed for flow cytometry

Cat.No: IT-Box-140

The ImmunoTools IT-Box-140 contains 100 vials, each with 100 µl of fluorescence conjugated antibody against human antigens.

<u>please note:</u> The amount of antibodies you need for your assay is USER-dependent (dependent from cell amount, receptor density, incubation volume, incubation time, temperature, quality of the antibodies, quality of the laser and detectors .....). You can do between 10 to 25 experiments with each antibody. If you use the antibodies at the first time, please do some dilutions to find out the best concentration for your individual requirements.
