

IT-Box-Systems for Flow-Cytometry

ImmunoTools special IT-Box-Systems give you the best price/quality ratio.

The IT-Box-Systems designed for flow cytometry contain vials with each 100 µl of fluorescence conjugated antibodies against human antigens.

anti-human

human IT-Box 140: 100 fluorescence conjugated antibodies (FITC, PE, PerCP, PE/Dy647)

anti-human

human IT-Box 141: 100 fluorescence conjugated antibodies (FITC, PE, APC, PE/Dy647)

and

anti-mouse

mouse IT-Box m278: 100 fluorescence conjugated antibodies (FITC, PE, APC)

please note: The amount of antibodies you need for your assay is USER-dependent (dependent from cell amount, receptor density, incubation volume, incubation time, temperature, quality of the antibodies, quality of the laser and detectors). You can do between 10 to 25 experiments with each antibody. If you use the antibodies at the first time, please do some dilutions to find out the best concentration for your individual requirements.
